

Enhancing Corporate Value through "Challenge and Innovation"

Linking Our Growth Strategies to Greater Corporate Value

Mitsui will enhance its corporate value by creating value, improving growth potential and reducing cost of capital. Through initiatives aimed at creating value in collaboration with our stakeholders, improving our business portfolio, and expanding and strengthening our management capital and foundation, we will create economic and social value in the form of *real solutions* to social issues, improve growth potential by shifting our owned assets to areas with high potential for earnings and growth, and reduce our cost of capital by building mechanisms and systems to lower future risks.

In *Gate 2 Growth Strategy*, we explain our growth Strategy and specific measures to effectively implement the above initiatives, and in *Gate 3 Management Foundation* we explain the corporate governance that supports us in doing so.
